

Flood Update

Dear Parents/ Carers,

It has certainly been an eventful first few days, with the specialist team from SKANSKA working around the clock to dry out the school and ensure that it is in a safe condition for the children's return tomorrow.

I am pleased to say that although there are some areas of the school that will need ongoing work over the next week or so, most of the areas affected by the flooding have either been rectified or vastly improved. **This means that we can safely manage the return to school for all children tomorrow.**

Unfortunately, there were some areas of the school that were more affected than others. In particular the library, which we will be unable to use for at least the first week, and also the Year 1 outside area, where much of the new bark has been washed away or has become unusable. Please be assured that we will be replenishing this area as soon as possible.

Despite the challenging start to term, we are all looking forward to seeing the children return tomorrow to start their new and exciting learning journeys.

Kind regards

Mr Lang
Headteacher
